Each arm of the Dual Monitor Arm by LifeDesk consists of a fixed angle link and a dynamic link which together provide a height range of 12" (monitor center located 7" to 19" above the desk) and a reach of 23". The independent arms allow for collaboration, use in portrait mode, and have sufficient clearance for up to 28" wide monitors. VESA mount compatible, with built-in wire management. Unit comes with both a clamp mount and a grommet mount.
