- Fits everyone from kids in 1st grade to adults over 6'
- Small footprint for smaller workspaces

The Only Work From Home Set-up That:

Teaches you how high your desk should be when doing sitting and standing work.

Reminds you to switch from standing to sitting and back again throughout the day.

Patented "Wellness While You Work" technology, powered by LifeDesk and StanData, will allow users to transition often between sitting and standing, ensuring proper posture with ergonomically-correct settings for both positions. Minimize the risk of developing musculoskeletal issues from a poor fitting work-at-home setup and maximize the health & wellness benefits electric sit-stand can offer.

Environmentally-friendly tops

Our powder-coated tops are environmentally-friendly and have the lowest carbon footprint in the industry. No edgeband. No backer. No adhesives. No solvent. 100% recyclable. Formeldahyde free.
